

**FITTING INSTRUCTIONS FOR EH0037BK/SI EXHAUST HANGERS  
KAWASAKI NINJA 250R 2008**

**Please note that the way the kit is packed does not necessarily represent the way of mounting to the bike**

Please note that in cases where kits are packed with rubber washers holding the components onto the bolt – *the rubber washers should be thrown away!*

- Remove OEM rear footpegs/exhaust hanger.
- Place the two shorter M8 button head bolts from kit through holes marked 'A' and 'B'.
- Offer up to bike as shown above and engage threads (do not tighten yet).
- Place the 10mm washer onto longer M10 button head bolt from kit and position as arrow 'C' through exhaust mount as shown.
- Place 10mm washer and M10 nyloc nut onto exposed end of bolt and tighten all bolts evenly.
- Please ensure when the motorcycle is being used that no parts are in such a position that they may collide/damage other bike parts (this is particularly important if using after-market cans or exhaust systems).

***Please note that it is your responsibility to ensure that no part of the exhaust hanger or exhaust assembly fouls or comes into contact with other parts of the machine. Do not ride the motorcycle until this aspect has been verified and you have compressed the rear suspension (if appropriate to the design of the motorcycle) to test this thoroughly.***
